Hair Extensions Review

There is nothing more glamorous or feminine than beautiful long and healthy hair. Like many women, I have always wanted long, luscious locks but have tried and failed to achieve it on many occasions. Although my hair has a degree of thickness and bounce, once it grows past about shoulder length, the ends are ratty and structure goes out the window, making it hard to handle or style.

I had always been curious about hair extensions but never really saw them as a serious option as of the many myths and misconceptions I heard throughout the years like they are very expensive, hard to maintain and they damage your hair. So this year having truly come to the end of my tether with trying to grow my hair once more, buying endless products for volume and doing everything but talking my hair around to growing I decided to find out the truth about hair extensions!

I did some research and came across a company called Get Glam. Get Glam are a mobile hair extensions enterprise that uses stunning 100% silky straight human hair, pre bonded with a nail shaped tip for quick and easy application and removal. Each 18" strand contains AAA grade human hair. I met up with Aisling and her business partner Jackie to discuss the process and left feeling assured that these ladies would do a fabulous job on my hair and the old wives tales about hair extensions are merely that. Aisling told me that she's hugely passionate

about what she does and customer satisfaction is the number one priority for Get Glam. "As an extensionist, it is so important to know your product, what you are using, what it is made of and how to safely and effectively remove the bonds so there is no possibility of damage."

"You get back what you put in. If you look after your hair extensions and get them removed properly by a qualified extensionist you won't have any problems and your hair will not be at all damaged. Some people think that getting hair extensions is a quick fix and they don't have to put in any effort. There actually isn't much maintaining them as long as you wash them properly in a downward motion i.e. the shower so as to avoid matting, use a good organic shampoo and heat defence spray and brush the hair thoroughly on a regular basis.

Aisling and Jackie arrived at my house with their selection of hair and began the system of colour matching and inserting the bonds. The process took about two hours but it flew by as we chatted about all things girly and they made the experience fun and very enjoyable! I could not believe when I looked in the mirror and saw that I had long, silky amazing hair that you would have no idea that I didn't grow myself. It is three weeks on now and they haven't shed and are in perfect condition. Aisling and Jackie provided a professional and efficient service and I would highly recommend them to anyone. Your hair is so important, particularly to women, so having confidence in a company to do this major transition for you is paramount and Get Glam certainly make you feel comfortable and assured.

"It's such a confidence builder and it's something a lot of people cannot have. If you have thin hair you are never going to have long gorgeous thick hair. With extensions, we can give someone something they can't naturally have themselves and their reaction is what makes us want to do this job. They often say that they feel like a different person and having this hair has changed their life and given them so much confidence. There are not a lot of things in life that can do that," says Aisling.

Get Glam carry a large range of hair in all colours can colour match and insert the extensions in the same day and they can work around your schedule coming at a time and place that suit you.
